THE TECH

VOL. XXVI. No. 73 BOSTON, MASS., MONDAY, APRIL 15, 1907 PRICE THREE CENTS

ATHLETIC EVENTS POSTPONED

Bad Weather Last Saturday Upset All Plans for the Day.

Bad weather conditions Saturday upset the entire athletic program for the day. The Junior and Sophomore baseball teams were forced to give up their games in the afternoon and the Rifle Club and Hare and Hound Associations were also forced to abandon their plans.

The hare and hound chase at Wellesley which had been anticipated with so much interest has been postponed to May 18. The Freshmen and Sophomores who are going into the class cross-country race will meet at the Field Wednesday afternoon to limber up and will walk over the course Friday morning.

The crack Junior team was to have played the Somerville High nine Saturday afternoon and gave up the game with much regret. Somerville always has a fast nine and the Juniors had hoped for a victory. The Sophomores were scheduled to meet Ballou and Hobigand at the Field.

The men who suffered most from the lay-off Saturday were the track men, most of whom are working hard to get into condition for the spring games which take place next Saturday.

MUST QUALIFY FOR EVENTS.

By winning a first, second, or third in an event next Saturday is positively the last and only chance that a man will have to make the varsity Track Team this year. The class games Saturday will start at 2.30 P.M. and will be run off in the following order:

Track events — 2.30, 880-yard dash; 2.45, 100-yard dash; 3.00, 120-yard high hurdles; 3.15, one mile run; 3.30, 220-yard dash; 3.45, 220-yard low hurdles; 4.00, 440-yard dash; 4.15, two mile run.

Field events — 2.30, high jump and shot put; 3.15, broad jump and discus throw; 3.45, pole vault and hammer throw.

No man who does not qualify in the trial heats of the 100- and 220-yard dashes and 120- and 220-yard hurdles next Thursday afternoon will be allowed to compete in these events Saturday.

PROF. WOODS TO LECTURE.

Professor Frederick S. Woods is to give an address on "The First Year of Mathematics at the Institute of Technology" at the fifth spring meeting of the Association of Mathematical Teachers, at Boston University on April 25.

PROF. GILL OPENS DEBATE.

Professor Gill, at the meeting of the northeastern section of the American Chemical Society, Friday evening, opened the discussion on a paper, "Some Phases of Practical Lubrication," which had been read by William M. Davis, formerly lubrication expert for the Standard Oil Company. Professors Lanza and Miller were called upon by the chairman for a continuation of the discussion, after which Dr. Walker made a few remarks.

MOST UNHEALTHY CONDITIONS EXIST

Atmospheric Conditions in the Lecture Halls of Institute Endanger the Health of Occupants. These Conditions can be Remedied.

That the most alarming conditions exist in our midst is shown by the results of the recent examination of the atmospheric conditions in some of the lecture rooms of the Institute buildings. For some time past there has been repeated complaint at the particularly stifling conditions in the Physics lecture room, 23 Walker, but it is only after an investigation of the cause and of the true state of affairs by THE TECH that a definite estimation of the harm that is constantly being done can be made public. Hungry after knowledge and studying to improve their fellows by enabling them to live under more healthful conditions, many members of the Sophomore Class are daily submitting themselves to conditions worse than any which at present prevail in the oldest Boston theatres.

The results which were secured from the Chemical Department from examinations conducted by the Air, Water and Food Laboratory under the careful supervision of Mrs. Richards show that at least ten parts of carbon dioxide are present in 10,000 parts of air, in this room when occupied. In the lecture halls in Rogers it has been found that the conditions are even worse for here as high as fourteen parts of carbon dioxide to the 10,000 exist.

While the results in Rogers are higher in examination, they are less in effect owing to the heighth of the ceiling. In 23 Walker, however, a smaller proportion is by far more appreciable. The tiers of seats in this hall extending to within a few feet of the ceiling in the rear of the room are known to be extremely uncomfortable and, as some of their occupants have expressed, they are "veritable sweat boxes" especially after the room has been occupied a few minutes.

(Continued on Page 2.)

SUMMER COURSES ARE ANNOUNCED.

The circular on the summer courses which the Institute will give this year has just been issued The number of subjects to be given is the same as usual and includes Analytic Geometry, Integral Calculus, Applied Mechanics, Mechanic Arts, Mechanical Drawing and Descriptive Geometry, Modern Languages, Chemistry, Physics, Civil Engineering, Mechanical Engineering, Architecture, and Biology.

The requirements for admission, and in general the work performed and the final examinations are expected to correspond with those of the regular school year. The courses are given both for those who wish to distribute their work over a larger portion of the year, and for those who wish to make up deficiencies. The continuity of effort and freedom from interruption made possible by summer work are of particular value in many of the laboratory courses.

OFFICERS NEEDED FOR CORPS.

A recent graduate of the Institute, who is now a member of the United States Artillery Corps, called at the Institute a few days ago. He was very enthusiastic over his work as an army officer, and believes that there is a particularly good field for Institute graduates in the army corps.

There is just at this time a large opening for new officers, as there are no second lieutenants in this corps. The former second lieutenants have been promoted to first lieutenants because of reorganization, and new officers must be appointed to fill these vacancies.

The ball game between Course V and X scheduled for Friday afternoon was called off. It is rumored that Course V withdrew from the contest.

DINE FOR TENTH TIME.

For the tenth time the Civil Engineering Society met Friday evening at the Copley Square hotel for its annual dinner. With several prominent men from outside and Institute Professors as speakers, the talk covered nearly every phase of civil engineering work.

Dean L. C. Sabin of Lawrence Scientific School opened the after-dinner speaking. After inquiring whether the society had given a $500 bond, he congratulated the students present for their choice of course. He called this the day of civil engineering, and pointed out the breadth of field.

Prof. Sedgewick gave some very good advice on patience, and called attention to the hybridization of modern sciences and the splendid results obtained by the crossing of two branches.

COMPANY D HONORED.

Company D, M. I. T. Battalion, has been selected to take part at the Military Levee to be held by the National Lancers on Thursday, May 2 at 8 P.M. in Mechanics Hall. Captain Bingham's company will consist of 56 men, all of whom will receive one ticket. Each company is to drill individually for about twenty minutes.

MONEY IS DUE TODAY.

Subscriptions for the Junior Prom must be paid today. The amount due is $5 and this amount must be paid by this afternoon. The committee of Juniors in charge of the Prom point out the fact that each man who has "signed up" for the Prom has in reality signed a note in which he promises to pay $5 on or before April 15. The money may be given to McGuigan, Gerrish, Putnam, Webb, Rapelye, or Glover.

CALENDAR.

MONDAY, APRIL 15.

1.00 P.M. Meeting of the Board of Editors of THE TECH in 30 Rogers.

4.00 P.M. Banjo Club Rehearsal in 33 Rogers.

4.00 P.M. Mandolin Club Rehearsal at the Y. M. C. A.

4.10 P.M. Prof. Swain's Reading in 11 Eng. B.

4.15 P.M. Tech Show Specialties Rehearsal at the Union.

4.30 P.M. Gym Team Candidates Report at the Gym.

TUESDAY, APRIL 16.

2.30 P.M. Tech Show Principals and Chorus Rehearsal at the Union.

4.15 P.M. Glee Club Rehearsal at the Y. M. C. A.

WEDNESDAY, APRIL 17.

4.00 P.M. Candidates for Freshman-Sophomore Cross Country Run Report at Field.

4.15 P.M. Tech Show Specialties Rehearsal at the Union.

4.15 P.M. Glee Club Rehearsal at the Y. M. C. A.

5.00 P.M. Class Day Committee Meeting in 27 Rogers.

NOTICES.

Gym Team.—Regular practice for the Gym Team will be held today at 4.30 P.M. All candidates are requested to report at the Gym.

Tech Show Tickets. — All tickets applied for will be ready for delivery this week. Those not paid for by 5 P.M. Monday, April 22, will be sold. Men are requested to bring the exact change.

Chemical Society.—The Chemical Society will hold its annual election and dinner at the Union on Wednesday, April 17, at 6 P.M. Tickets at 85 cents each may be obtained from Todd, '08; Tetlow, '08; Moses, '07; Babcock, '07, and Koppitz, '09.

Technology Club.—On the ninth evening of the season of the Technology Club, Wednesday, April 17, at eight o'clock, James P. Munroe will give a smoke talk on "The Heart of the United States." Members have the privilege of bringing guests.

Electrical Engineers.—The Boston branch of the American Institute of Electrical Engineers will hold a meeting April 17 at 8 P.M., in 6 Lowell. A paper entitled "A Comparison of the Puyallup and Taylor's Falls Hydro-Electric Systems" will be given by J. F. Vaughan, engineer with Stone & Webster, Boston. The paper will be illustrated. Non-members are cordially invited to attend the meetings, and any such desiring regular notices are requested to communicate with the secretary.

EXAMS BEGIN APRIL 22.

The final examinations for the Cabot Medals, for which over one hundred men were examined last October, will commence April 22, lasting three weeks. The announcement of the winners of these medals, which are awarded both for physical development and class work during the past six months, will probably be made just before or during Commencement Week.

THE TECH

Published every Monday, Wednesday, and Friday during the college year (from September to June), by students of the Massachusetts Institute of Technology.

Entered as second-class matter October 6, 1904, at the post office at Boston, Mass., under the Act. of Congress of March 3, 1879.

Monday, April 15, 1907.

An abstract of an article by Professor Niles on Professor Crosby's work at the Institute will appear in THE TECH in the near future.

THE TECH heartily endorses Mr. Mahan's plan to give the honors to the men who are doing the best work. In the past a large number of men have expected to get into the dual and intercollegiate track meets by coming out in the last few weeks of the season and making a brilliant showing. Mr. Mahan intends now that the men who come out at the beginning of the season and who do the best work in the spring games shall be the men to represent the Institute in the dual meets. It is expected, of course, that those men who are always looking for honors without doing any work are going to raise a "howl" that the plan is "not fair," etc. No attention is going to be paid to these men. The man who went out to the Field the first day and has practiced faithfully since then is the one who deserves the honor and the pleasure of being an official athletic representative of the Institute. The necessity of giving the places to such men is obvious, for, as Mr. Mahan says, "every day's training now means so much better form a month from now." Those men who expect to make the Track Team must settle down to work today and practise faithfully all week, for the spring interclass meet takes place next Saturday and the Track Team will be picked then. Only the winners of the first two places in the class games will be taken on the trip to Orono, and only the winners of the first three places will be allowed to start in the dual meet with Brown. It can not be too strongly emphasized that the make-up of this year's team depends entirely upon the showing made next Saturday and that a man who does not win a place then has no chance to make the team this year.

Must Work For Honors.

MOST UNHEALTHY CONDITIONS EXIST.

(Continued from Page 1.)

Contrasted to these conditions is the state of affairs in the newer buildings, Lowell and Pierce. Here it has been found that from five to six parts to the 10,000 is the maximum amount attainable.

That these stifling conditions are needless can be shown by the results obtained in abolishing the nuisance in the oldest theatres. Air which in many cases has contained as high as forty-eight parts has been reduced to five parts in some instances by improvements in the ventilating systems. This latter condition is as good as can be obtained in any hall without excessive draughts.

In connection with the conditions in 23 Walker it is interesting to note that the maximum proportion of carbon dioxide present is about twenty minutes after the commencement of a lecture. This is attributed to the rush to get in the hall, necessarily at first accompanied with heavy breathing on the part of the occupants.

Further information in regard to the matter has shown that these existing conditions not alone tend to injure the health, but to this cause is attributed the general drowsiness which creeps over the occupants before the conclusion of exercises.

ARCHITECTS TO RECEIVE.

Another event is to be added to the Junior Week calendar. On Wednesday afternoon the Architectural Society is to give a reception in the rooms of the Department. A committee has been at work on the arrangements for some time and the affair promises to be one of the most brilliant events of the Institute's one social week. Invitations are to be issued next week and those who get them may consider themselves fortunate.

Amateur Photographers ATTENTION!

CARRIAGES

COLONIAL THEATRE.

Fay Templeton is in her last week at the Colonial Theatre in "Forty-Five Minutes from Broadway," and is also in her last week upon the Boston stage, since she makes the positive statement that she will retire from the stage upon the conclusion of this season. She has been given a royal welcome back to Boston and her Mary proves the biggest hit of the comedy by George Cohen. Just to hear her sing "So Long, Mary" is one of the treats of the production and all Boston is whistling its refrains.

HOLLIS STREET THEATRE.

Ellen Terry's return to the Boston stage at the Hollis Street Theatre this week is by all odds the most notable event of the season at that house. Miss Terry has always been considered the most distinguished actress on the English stage, and as it has been several seasons since she has stayed in Boston, her coming is sure to attract an unusual amount of attention. Her tour of America is now nearing its conclusion. The opening bill will be "Capt. Brassband's Aversion" and before she leaves Boston she will appear in "The Good Hope" and "Nance Oldfield."

PARK THEATRE.

College athletes will take their leave of "Strongheart" at the Park Theatre during the coming week, and never again will Robert Edeson appear here in this football drama which has been so universally admired by all Tech students and graduates. It is a vivid and attractive picture of college days and makes one young again with its love affairs and its picture of athletics. The football game is intensely stirring and gives all the enthusiasm of the gridiron. "Strongheart" is to be withdrawn because Mr. Edeson has arranged to produce an entirely new play next season.

The Columbia freshmen won the intercollegiate freshman basketball championship by defeating the Harvard freshmen recently.

ARCHITECTS AFTER BIG PRIZE.

Nine architects, including two former fifth-year students, made their preliminary twelve-hour sketch of "A Soldier's Home," the problem in the competition for the twelve hundred dollar travelling scholarship of the Department, Friday. The competition is to run for five weeks and the drawings will be made "en loge" without any criticism.

The competition is open only to men who have spent at least two years at the Institute, one of these being in the graduate class. The winner will spend one year in foreign travel and study, the program to be arranged in consultation with the Department of Architecture.

The problem is to design a home for army and navy veterans, to be situated on a large river near a prominent military station, such as Fortress Monroe. The architectural feature of the home is to be a glorious Pantheon, containing military and naval trophies, to be guarded sacredly by the veterans.

TECHNIQUE EDITION IS LIMITED.

Tickets for *Technique '08* are now on sale. The editors are going to print only a limited edition of the book this year, and will base the number of the edition on the number of tickets which have been sold. The editors do not wish to have a large number of books on their hands after Junior Week. Tickets can be procured of any of the men on the Board of Editors or at the Cage.
